Nuclear Engineering and Design 133 (1992) 525–527
North-Holland

Contents of Volume 133

CONTENTS OF ISSUE 133(1)

Preface to Division D: Performance and Life Extension of Operating Reactors (pp. 3–80), *L.J. Reynes and J. Carey* 1

Effect of residual stresses and complex loadings on the fatigue behavior of underclad cracks, *J.L. Bernard, J. Vagner, A. Pellissier-Tanon and F. Faure* 3

Vibration monitoring of the primary piping system during the hot functional tests of the Mülheim-Kärlich PWR (*Technical Note*), *V. Bauernfeind, Th. Bloem, W. Pache and H.J. Diederich* 17

Flow-assisted corrosion: a method to avoid damage, *F.N. Remy and M. Bouchacourt* 23

Acceptance criteria for structural evaluation of erosion–corrosion thinning in carbon steel piping, *T.L. Gerber, A.F. Deardorff, D.M. Norris and W.F. Lucas* 31

Short-term degradation mechanisms of piping (*Technical Note*), *A.R. Morel and L.J. Reynes* 37

Review of the Belgian experience of reactor core internal components (*Technical Note*), *P. Briegleb and P. Mignot* 41

Age-related degradation of boiling water reactor vessel internals, *A.G. Ware and V.N. Shah* 49

Behaviour of steam generator tubes in Belgium and its consequences (*Technical Note*), *G. Roussel and P. Mignot* 63

Application of annealing for extension of WWER vessel lives (*Technical Note*), *V. Badanin, Y.G. Dragunov, V. Fedorov, I. Gorynin and V. Nickolaev* 71

Crack-depth effects in the cylindrically guided wave technique for bolt and pump-shaft inspections, *Y.M. Tsai, S.N. Liu and G.M. Light* 77

Preface to Division Q: Concrete and Specific Aspects of Non-Metallic Materials (pp. 83–130), *Z.P. Bažant* 81

Fracture testing of concrete and rock materials, *M.P. Luong* 83

Orthotropic behavior of concrete with directional aspects: modelling and experiments, *S. Ramtani, Y. Berthaud and J. Mazars* 97

Long-term tests of reinforced concrete beams loaded by temperature gradient or settlement of a support, *J. Jokela* 113

Leakage of gas through concrete cracks, *T. Suzuki, K. Takiguchi and H. Hotta* 121

Preface to Divisions H: Concrete Structures, and T: Flow-induced Dynamics (pp. 133–180), *K. Kussmaul* 131

French 1500 MW fast-reactor project: proposal for a reactor-bearing concrete slab, *D. Amir-Mazaheri, M. Bolvin and J. Moinet* 133

Post-test analysis for the nonlinear response of an internally pressurized one sixth scale reinforced concrete containment model, *P.A. Pfeiffer, J.M. Kennedy and A.H. Marchertas* 143
Analysis of an ice-condenser containment building anchorage system, *F. Fanous, L. Greimann and W. Wassef* 159
Flow distribution at the bottom region of a steam generator tube bundle, *M. Padmanabhan, M.L. LeClair, S. Chandra and E. Grondahl* 169

Instructions to contributors 181

CONTENTS OF ISSUE 133(2)

Engineering Mechanics, Structures and Materials
A modified CCFS approach for the seismic analysis of multiply supported MDOF secondary systems, *A. Saudy, A. Ghobarah and T.S. Aziz* 183
A semi analytical model for Fourier amplitude spectrum of earthquake ground motion, *A.K. Ghosh* 199
Finite element reliability analysis of fatigue life, *H.H. Harkness, T. Belytschko and W.K. Liu* 209
The viscoplasticity theory applied to the inelastic analysis at elevated temperatures, *T. Hiroe and T. Igari* 225
Recent new improvements of computer codes for nuclear fuel elements performance analysis, *S. Mehedinteanu* 239
Finite element dynamic bifurcation buckling analysis of torispherical head of BWR containment vessel subjected to internal pressure, *N. Miyazaki, S. Hagihara, T. Ueda, T. Munakata and K. Soda* 245
A compound crack in a pipe under tension, *A. Zahoor* 253
Thermal-Hydraulics and Related Safety
Downcomer and tie plate countercurrent flow in the Upper Plenum Test Facility (UPTF), *H. Glaeser* 259
Impact of rapid condensations of large vapor spaces on natural circulation in integral systems, *Z. Wang, K. Almenas, M. diMarzo, Y.Y. Hsu and C. Unal* 285

Reviewers 1990 301

Book review: 'Structural Dynamics – Recent Advances' by G.I. Schuëller, *K. Kerkhof* 311

Announcements 313

Instructions to contributors 315

CONTENTS OF ISSUE 133(3)

Preface, *A.R.S. Ponter, F.A. Leckie, C.E. Pugh and G. Baylac* i

Inelastic deformation and rupture under severe thermal loading, *A.C.F. Cocks, A.R.S. Ponter and K.F. Carter* 317

Fatigue maps and multistage life prediction methods, *F. Pratesi, G. Zonfrillo and A. Del Puglia* 325
Fatigue strength of dissimilar welded joints for the main vessel of an LMFBR, *K. Kuwabara, Y. Takahashi, S. Kawaguchi, Y. Fukuda and J. Fukakura* 335
Lifetime prediction of structures in anisothermal viscoplasticity coupled to damage, *J. Lemaitre, A. Benallal and D. Marquis* 345
Analytical evaluation method of *J*-integral in creep–fatigue fracture for type 304 stainless steel, *Y. Asada, T. Shimakawa, M. Kitagawa, T. Kodaira, Y. Wada and T. Asayama* 361
Nonisothermal constitutive modeling of inelasticity based on bounding surface, *N. Ohno and J. Wang* 369
Mechanistic considerations for TMF life prediction of nickel-base superalloys, *D.L. McDowell, S.D. Antolovich and R.L.T. Oehmke* 383
Viscoplasticity theory based on overstress: the modeling of ratchetting and cyclic hardening of AISI type 304 stainless steel, *E. Krempl and S.H. Choi* 401
The characteristics of viscoplastic effects in dynamic crack propagation in nuclear reactor pressure vessel steels, *C.H. Popelar and Y.C. Sheu* 411
Viscoplastic modeling of dynamic fracture events in reactor pressure vessel steels, *B.R. Bass, J. Keeney-Walker, S.-J. Chang, J.S. Parrot, C.E. Pugh, K. Hornberger and C.W. Schwartz* 419
A method of caustics for the direct experimental measurement of the T^*-integral in nonlinear and dynamic fracture mechanics problems, *T. Nishioka, T. Fujimoto, K. Sakai, T. Murakami and K. Sakakura* 433
Computational thermofracture mechanics and life prediction, *T.-R. Hsu* 447
Numerical investigation of *J*-characterization of growing crack tips, *F. Nilsson* 457
Standardization of procedures for the high-temperature crack growth testing for FBR materials in Japan, *Y. Asada, M. Kitagawa, N. Shimakawa, T. Kodaira, T. Asayama and Y. Wada* 465
Viscoplastic analysis of shells of revolution under axisymmetric loads, *F.G. Kollmann* 475
Analytical crack growth evalulation of a plate with a surface crack, *K. Watashi, I. Furuhashi and H. Yoshida* 489
Numerical simulation of local non-linearities due to tube–support interaction (*technical note*), *M. Larabi, B. Buff and S. Granger* 505
Approximate inelastic analysis of defective components, *R.A. Ainsworth and P.J. Budden* 513
